DETAILED ACTION

1. Applicants' response filed on 12/16/2010 amended independent claim 1. Applicants' amendments in light of their arguments including the Declaration under 37 CFR 1.132 signed by Laimute R. Svarcas filed 9/28/2010 are persuasive and, therefore, the 35 USC 103 rejection over Blythe in view of Patel further in view of Teacherson from the previous office action is withdrawn. For the reasons stated below, claims 1, 5-6, 8, 10 and 12-14 are in allowable condition.

Examiners Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

A) At the beginning of line 1 on page 1 of the specification:

Please, add the phrase, "This application is a 371 of PCT/US03/12090, filed 04/17/2003."

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance:

As evidenced by the prior art references of record, it is well known in the art to lubricate a two-stroke engine containing a power valve with a fuel:lubricant mixture wherein the lubricant comprises a base oil and additives including a reaction product between a fatty hydrocarbyl-substituted monocarboxylic acylating agent and a polyamine, a Mannich dispersant, and a friction modifier.

However, two-stroke engines require high undercrown ratings as well as high power valve ratings with limited treat rate of additive components. Applicants' claimed composition has a very narrow concentration of all additive components and from the example formulations it is evident that only the specific additives in their narrow concentrations lead to unexpected results wherein the undercrown rating is high, meanwhile maintaining excellent power valve ratings. The prior art lubricants show ranges that overlap those of the instant claims but the art does not show the synergy in terms of deposit control for the compounds of instant claim 1.

The applicants' instant invention does demonstrate unexpected results and the claims are commensurate in scope with the data provided. Unexpected results are demonstrated in terms of reduction of undercrown rating and power valve rating.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
